⊕ Overview

As a programmer with more than 3 years of experience in developing websites, web applications, dynamic personality, always dedicated and responsible at work, always actively learning and completing the assigned work well.

Have a strong background in terms of UI building and API building, clean code. Experience in building and managing complex projects flexibly. I want to develop myself further to become a full-stack developer who can meet all needs, take on all challenges from the company and customers.

During my time in the previous workplace, I not only learned technical skills, but also knowledge in the field of e-commerce, logistics, always aiming to achieve the best user experience.

My goal: to become a better developer, will learn, research and hone strongly in front-end knowledge because I want to bring the best user experience. Besides, I still hone my back-end skills to get better and better and become the Technical Lead.

🗄 Work experience

3/2021 – 7/2021

Magento Developer

FPT Software (Viet Nam)

- Programmer for a major camera manufacturing company in the Japanese and American markets (Canon).
- From a Fresher I took on the position of developing categories and optimizing products.
- I had the opportunity to work with foreigners for the first time, improving my listening skills.

7/2021 - 4/2023	**Full-stack Web Developer**

- FPT Software (Viet Nam)
  Start working with my primary language – NodeJs, ReactJs.
  Building a warehouse management system for nutrition supplier
  3A Nutrition (Abbott) based on NodeJs (ReactJs & Nestjs).
  I was assigned the main development task of Front-end, in charge
  of developing ReactJs for web applications, developing Single Page
  Application that integrates QR code scanning into the application
  to be able to scan codes and many other features. to be able to
  operate warehouse processes.

  operate warehouse processes.

5/2023 - Present　　**Full-stack Web Developer**

Suzu Group

- I started working with a team of about 8 people, building a website for Loc Troi Group.
- I work as a Frontend, building user interfaces using Reactjs and Nextjs. Read design files from Figma
- After about 4 months, the team completed the website for Loc Troi Group, and I was able to participate in the project of building a social network for the company. This was the time when I learned quite a bit about how to deploy a project from Fontend to backend. I do full stack built on Turbo Repo architecture, using Reactjs and Nextjs languages, Tailwind CSS, postgresSQL, ...
